

Evaluation Interview - Expert [*id:2*]

(second iteration)

SLEEC 1

Q1. Is the SLEEC rule correct and effective in preventing or reducing ARI's unethical behavior?

I think the SLEEC rule might not always be effective. For example, if the door is already open, keeping it open doesn't really change anything. We may need to consider additional measures, such as opening a window, to ensure it actually prevents or reduces ARI's unethical behavior.

Q2. Are the principles correctly mapped to the SLEEC rule, the base rule, and the hedge clauses? Are there any principles not covered by this mapping?

I think the principles are correctly mapped. With the open window hedge clause, privacy is no longer violated; additionally, there is no need to keep explaining why the door is open. Unless there's another reason to provide an explanation, the mapping seems fine.

Q3. Is the proposed rule correctly labeled as Social, Legal, Ethical, Empathetic, and Cultural?

So it seems more focused on ethical and cultural aspects. I was thinking that this rule is also about creating a good temperature for the patient to do exercise, I would add the empathetic label.

SLEEC 2

Q1. Is the SLEEC rule correct and effective in preventing or reducing ARI's unethical behavior?

I think the SLEEC rule can help prevent or reduce ARI's unethical behavior, but it might be too limited if it only considers tiredness. I would suggest replacing 'tiredness' with 'physical issues' to better capture user safety. The robot should recognize if the user could be injured or has physical issues, stop the session, and trigger a nurse alert or call for assistance to ensure the user's well-being

Q2. Are the principles correctly mapped to the SLEEC rule, the base rule, and the hedge clauses? Are there any principles not covered by this mapping?

The principles you identified are correctly mapped. However, I think the hedge clause 3 also relates to explainability because the robot notifies the user about the session. This makes it clear why the session is being stopped, helping the user understand the robot's actions.

Q3. Is the proposed rule correctly labeled as Social, Legal, Ethical, Empathetic, and Cultural?

I think the rule is correctly labeled, but I would also label it as cultural. Motivation itself is culturally shaped; in some contexts, motivating could work better through logical explanations, while in others it might rely more on emotional encouragement. So the way the rule is applied depends on cultural habits and interaction styles.

SLEEC 2a

Q1. Is the SLEEC rule correct and effective in preventing or reducing ARI's unethical behavior?

Yes, it works. The more detailed version builds on the previous rule, so I think this is okay.

Q2. Are the principles correctly mapped to the SLEEC rule, the base rule, and the hedge clauses? Are there any principles not covered by this mapping?

I think it is good, we can keep only beneficence as the principle here, since it supports physical activity.

Q3. Is the proposed rule correctly labeled as Social, Legal, Ethical, Empathetic, and Cultural?

I agree with labeling it as empathetic. Adding cultural label could also make sense for the same reason in the previous SLEEC.

SLEEC 3

Q1. Is the SLEEC rule correct and effective in preventing or reducing ARI's unethical behavior?

Yes, I think it is correct.

Q2. Are the principles correctly mapped to the SLEEC rule, the base rule, and the hedge clauses? Are there any principles not covered by this mapping?

Yes, it is good, but I think the principle also protects autonomy. For example, the patient may have explained in the form that they don't want to share certain information with a specific person. Respecting that choice reflects the mapping to autonomy.

Q3. Is the proposed rule correctly labeled as Social, Legal, Ethical, Empathetic, and Cultural?

Yes, they are correctly labeled.

SLEEC 4

Q1. Is the SLEEC rule correct and effective in preventing or reducing ARI's unethical behavior?

Yes, it seems good.

Q2. Are the principles correctly mapped to the SLEEC rule, the base rule, and the hedge clauses? Are there any principles not covered by this mapping?

I think transparency could also fit here. For example, when informing the nurse that the user is in a certain stage, or explaining why the user hasn't eaten because of that stage, this is a form of transparency.

Q3. Is the proposed rule correctly labeled as Social, Legal, Ethical, Empathetic, and Cultural?

Yes, they are correctly labeled.

SLEEC 5

Q1. Is the SLEEC rule correct and effective in preventing or reducing ARI's unethical behavior?

Yes, it is correct.

Q2. Are the principles correctly mapped to the SLEEC rule, the base rule, and the hedge clauses? Are there any principles not covered by this mapping?

By giving the patient a snack, we are also protecting their dignity, accommodating their will. And if the robot informs the nurse that the patient has eaten the snack because their glucose was low, that also adds transparency to the mapping.

Q3. Is the proposed rule correctly labeled as Social, Legal, Ethical, Empathetic, and Cultural?

I don't think this should be labeled as empathetic. We are not giving the snack because the patient is hungry, but because their glucose is low. So the action is more about addressing a medical need than showing empathy.

SLEEC 6

Q1. Is the SLEEC rule correct and effective in preventing or reducing ARI's unethical behavior?

Yes, it works, though the cheat meal still decreases the level of beneficence. It's not as good as following the diet strictly, but it is not dangerous. Therefore, the rule remains effective in supporting the user's health.

Q2. Are the principles correctly mapped to the SLEEC rule, the base rule, and the hedge clauses? Are there any principles not covered by this mapping?

Yes, I agree with the rule mapping.

Q3. Is the proposed rule correctly labeled as Social, Legal, Ethical, Empathetic, and Cultural?

I agree that labeling it as ethical and empathetic is appropriate.

Final questions

Q5. Are there any SLEEC rules you consider missing?

I do not identify any missing rules.

Anything to add?

I do not have any additional comments.
